

COMMON NAME REFERENCE

We truly believe in the use of botanical names to correctly identify plants within the green industry profession. However, common names are often all the reference you have. Common names can also be interesting and educational, i.e. Lumberjack's Toilet Paper, Johnny-prick-nose, or Our-lady-in-a-boat. The following lists has been compiled from a variety of sources. It is not meant to be a complete list of all common names. Some names refer to plants not listed in our catalog. Hopefully, it will prove a valuable reference.
